iOS StoreKit vs. 3rd Party Service

iOS StoreKit vs. 3rd Party Service

StoreKit

User Trust
User Security
No backend required
Simplicity for users
Faster Checkout

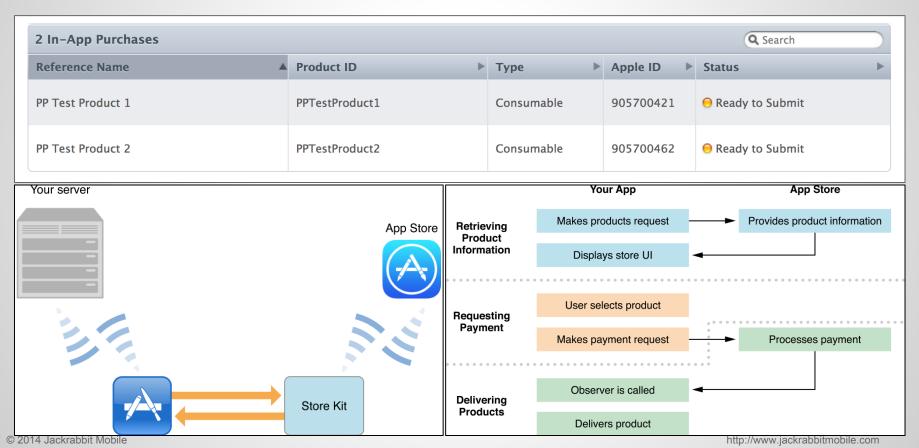

High Transaction Fees (30%)
Apple needs to approve "products"
Restricted to Apple's pricing (\$0.99, \$1.99, etc)
StoreKit is awkward

3rd Party

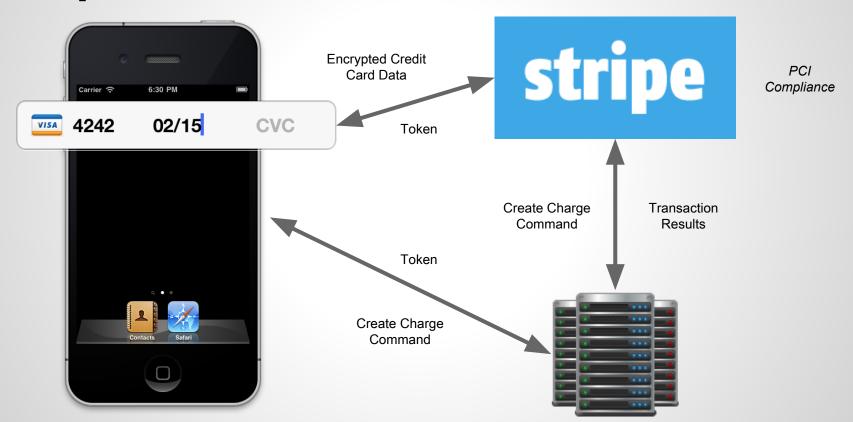

Cross-platform availability
Lower transaction fees
Many APIs available
Flexible pricing

Less standardized
Security concerns
Requires backend support
Manual credit card entry

iOS StoreKit

Stripe
